Canadian Seed Growers' Association

Catalogue of Registered and Extra No. 1 Seed and other Seed of special merit

Produced in 1921
and offered for sale

Headquarters of the Association
114 Vittoria Street
Ottawa

G. H. CLARK,
President

L. H. NEWMAN,
Secretary-Treas.

THE CANADIAN SEED GROWERS' ASSOCIATION

The Canadian Seed Growers' Association (incorporated) is the Bureau of Registration of Seed in Canada. It acts as a sort of clearing house for pure bred seed produced in the Dominion. Its membership is composed of farmers who endeavor to produce pure seed of high quality and vitality for market.

REGISTERED SEED GRAIN AND POTATOES

In order that this seed may receive special recognition and that those who wish to purchase such seed may be assured that they are getting what they order, a system of Registration, somewhat similar to the Registration of Live Stock is followed. Seed taken from a crop which has passed a satisfactory field inspection for purity of variety and which is itself of good quality, free from weed seeds and other cultivated grains, germinates at least 95% (in case of cereals) and which, in case of potatoes, is up to a certain standard as regards freedom from disease, is known officially as **Registered Seed**. Such seed is sold in sealed sacks with registration tags and seals attached, after a final inspection of the cleaned seed has been made.

EXTRA No. 1 SEED GRAIN

Seed from a crop passing a satisfactory field inspection for purity of variety and which when harvested and cleaned for market is found to be free from noxious weed seeds, germinates at least 90% (in the case of cereals) is at least 2 lbs. above the standard weight per measured bushel, **but which is found to contain a few kernels of some other cultivated grains** (but not more than 50 per pound) is entitled to receive the official seed grade called **Extra No. 1**. This grade of seed may be handled either in sealed sacks with appropriate tags attached or in bulk. The certificate of grade which is provided in this case by the Dominion Seed Branch, is attached to the bill of lading or invoice.

No. 1 SEED POTATOES

*(Certified Seed).

Seed Potatoes not pure enough as to variety to be graded as "Registered," but taken from fields which have been inspected carefully for purity of variety and freedom from disease by a recognized authority on potato diseases may receive the official seed potato grade called **No. 1**, provided not more than 1% of foreign plants are present and not more than a certain small percentage of the plants or tubers are affected with disease.†

No. 1 Seed Potatoes or "Certified Seed" as they have heretofore been commonly known, must not be confused with Registered Seed. In the case of the latter the strain must be pure, while in the former a small percentage of foreign varieties is permitted.

No. 1 Seed Potatoes are handled in sacks or barrels bearing tags on which the above grade is designated and defined.

*This grade is provided by the Botanical Branch of the Central Experimental Farm, Ottawa, whose officers perform the field and tuber inspection necessary.

†The exact percentage of diseased plants or tubers allowed in Grade I Seed Potatoes will be given on application to the Botanical Branch, Experimental Farm, Ottawa.

PRICE LIST OF REGISTERED AND OTHER SEED OF SPECIAL MERIT

The following list includes **Registered Seed**, **Extra No. 1 Seed**, **No. 1 Seed** (in case of potatoes) and seed which, while possessing certain merits, will not qualify for any of these grades.

The grade to which each lot of seed belongs pending final inspection (which latter may alter the grade) is indicated in the column provided for that purpose. Where this space is left blank it is to be understood that the seed concerned either belongs to a variety which has not yet been accepted for registration, or the information regarding the sample at time of going to print is incomplete. In some cases, however, there may be other reasons why the space has been left blank but these are given as a rule in the column headed "Remarks re Sample, etc." Where the grade is not given the Seed is not inspected and tagged before being shipped. In these cases it is advisable to buy on sample.

The price, where not indicated, will be quoted on application to the grower.
